

**Official Developers of the Flea & Tick Protector and Calm for Pets**

"Our mission is to help your pets live a long and healthy drug free life"

## Our pets have biological similarities as we do!

All living things, large or small, plant or animal, are made up of cells. Most living things are made up of one cell and they are called unicellular organisms. Many other living things are made up of a large number of cells that form a larger plant or animal.

These living things are known as multicellular organisms.

The idea that energy fields influence physical development is beginning to gain acceptance in the medical community. The increasing number of studies in this field confirms this. In the early 20<sup>th</sup> century, Professor Harold Saxton Burr and Dr. Leonard Ravitz from Yale University's School of Medicine published numerous reports describing the biofields of energy surrounding every living creature.

At PetZone, a division of AlphaBio Centrix, we study the effects of the human and animal electrical system by using **Bio Synthesis Technology**. This technology offers our team of engineers and doctors an insight into the bio electrical nature of the cells that are known as multicellular organisms. Our electrical energy is generated by chemical processes in nerve cells.

Billions of nerve impulses travel throughout the human brain and nervous system, resulting in life-force, which is the least understood and most taken for granted.

**The Flea & Tick Protector** and **Calm** are examples of products that are specifically made to increase the immune system of animals by using embedded Bio Synthesis Technology to balance your pet's immune system when it becomes threatened by parasites. It also helps work to control a wide variety of secondary symptoms such as:

- ✓ **Anxiety**
- ✓ **Eating Disorders**
- ✓ **Emotional Disorders**

## Official Developers of the Flea & Tick Protector and Calm for Pets

"Our mission is to help your pets live a long and healthy drug free life"

This technology is safe and effective to both humans and animals to improve the balance and energy in all living creatures. Everything we know and understand has a vibrational frequency or signature measured in Mega Hertz (MHz).

Royal Rife, Paul Nogier and Jack Swartz were the original pioneers of frequency medicine. They dedicated their lives to discovering the frequencies that correspond to such things as: various diseases, bacteria, viruses and other microorganisms.

In diagnostic medicine, frequencies are well known: EKG's for the heart, EEG's for the brain, and MRI's for injured cells. The Flea & Tick product is capable of utilizing and emitting specialized frequencies (from 1-40,000 MHz). These frequencies are well documented healing wavelengths in the red and infrared spectrum.

PetZone understands the benefits of healthy functioning frequencies that emit from our bodies, and we study their energetics so we can duplicate them onto an advanced metalized material that is used in all the products we manufacture at our plant.

*Through our patented AFG Synthesis process, these strings of frequencies are programmed into a small disk that is attached to your dog's tags to protect them from the harmful effects of flea and tick bites.*

## Official Developers of the Flea & Tick Protector and Calm for Pets

"Our mission is to help your pets live a long and healthy drug free life"

### Good Nutrition is important for your Pet's Health . . . so is the protection against fleas and ticks!

Our mission is to help your pets live a long and healthy drug free life. Researchers have found that pets can live a longer happier life with an improved habitat. Fleas and ticks are insects adapted for piercing skin and sucking blood from your pets. They are external parasites who live off the blood of mammals, thereby causing health afflictions. It has been noted that some chemical products do more harm than good, instead of protecting your pets from pests, it starts a chemical reaction that can be devastating to your pet.

### How it Works!

The PetZone products work with bioenergy that surrounds every living being, including animals. This energy field cannot be seen, but science tells us that all living creatures are not just a physical structure, but like everything else, are composed of bioenergy fields that can be measured by various magnetic imaging devices that measure the electromagnetic fields.

### Flea's & Tick's Habitat

Fleas and ticks usually remain on their warm-blooded hosts at all times. They can also be found on shoes, pant legs, or blankets, which can transfer the critter to new environments. They are often found infesting opossums, raccoons, and skunks in urban settings.

### Threats

Fleas are the most common transmitter of the rare Bubonic Plague. They also transmit the bacterial disease murine typhus to humans through infected rats. Their saliva can cause serious Flea Allergy Dermatitis in pets, and their feces has been reported to cause similar allergic reactions in humans. Fleas can also transfer tapeworms and cause anemia in pets. Flea bites commonly cause painful, itchy red bumps. Pet owners may not be bothered by fleas until the pet is gone for a long period of time. Fleas look for other sources of food and begin to bite humans. Bites often occur around the waist, ankles, armpits, and in the bend of the elbows and knees.

### Drug Free Solution

The **Flea & Tick Protector** is a drug free solution made for pet owners who understand the danger of using too many drugs. The excessive use of these chemicals are harmful and extremely dangerous to your animals' health.

PetZone cautions the use of chemical sprays and pesticides that can cause a myriad of damage to the pet's internal organs and respiratory system. Keep your pet safe from any chemical substance.

## A Happy and Satisfied Customer

Her name is Blair, five and half month old Shepard.

"I got the Flea & Tick Protector two months ago, and yes, we think it's Awesome!

Denise Schiavone  
Randolph, New Jersey,  
Thanks

Let us know your thoughts and opinions. We love to hear from our customers. Send us a photo of your pet and we'll put your comments and a picture on our Next Newsletter.

PetZone,  
Customer Service

### Ready for Retail Sales:

The **Flea & Tick Protector** and the **Calm** are professionally packaged in a 4"x7" four-color custom envelope with glued sealed ends for security. It holds (six) chips, a (*one year supply*). The package has easy instructions on how to use.

**Instructions:** Attach (one) chip to the dog's ID holder, and attach it to the animals' collar. Once the chip is removed from the backing paper it is effective for up to two months. Replace with a new chip every two months for best results. The Chips can be used on dogs and cats of all ages.

### How it's programmed:

The process in which the disk is programmed is by generating a frequency program ranging from 30 MHz to 130 MHz, a special Accelerator Frequency Generator, (AFG) applies a voltage ranging from 1 volt to 3 volts between coils in a containment field that produce waves of frequencies. These volts of energy cause the material to hold the frequencies to be suspended for up to a two year shelf-life. This process is called: **Bio Synthesis Technology**.

The disk is made from a material that contains 22.8% carbon elements, which is embedded into a rainbow substrate material and then domed for environmental protection.
