MERLIN

PERSONAL IMPULSE RADIATOR

Your Protection Against 5G Emissions

Reduce potentially harmful 5G exposure with Merlin's advanced electromagnetic shielding technology.

How Does Merlin Protect You?

Reduces 5G Exposure

Merlin functions as an "attenuator," lowering 5G signal intensity without disrupting your phone or internet service.

EMF Shielding

By emitting an 8Hz frequency aligned with the body's natural rhythm, Merlin helps counteract radiation from Wi-Fi, 4G, and 5G towers.

Simple to Use

Just press and hold the ON button for 1.5 seconds to activate. A green light indicates when Merlin is working.

WHAT IS MERLIN?

A Shield Against 5G, Wherever You Go

Merlin is a mobile device designed to generate low electro-magnetic pulses (EMP), reducing 5G emissions without interfering with your devices. With a coverage area of up to 7 meters (29 feet), Merlin creates a safe space, minimizing your exposure to potentially harmful frequencies. Compact, portable and perfect for home, work, or travel.

KEY FEATURES

- Covers up to 527 sq. ft of protection
- Battery or 110V powered
- Lightweight and portable
- Patented tech with a modern design

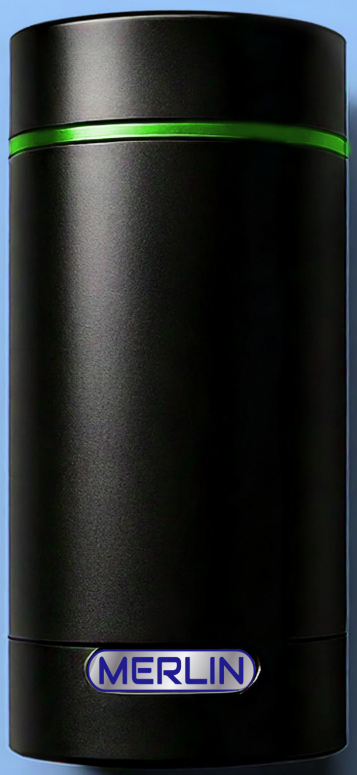
5G Radiation and it's Growing Impact

Increasing Exposure
5G networks require closer tower placements, meaning more antennas near homes and offices. This increases EMF exposure significantly.

Health Sensitivity
Some individuals experience sensitivity to electromagnetic frequencies, leading to discomfort or other health concerns.

The Merlin Solution
Merlin provides an easy-to-use, non-intrusive solution to reduce your exposure and create a safer environment.



Designed for Protection and Convenience

Dimensions: 6.75" tall x 3.5" diameter

Weight: 1.0 lb (lightweight & portable)

Power: 110V outlet or optional 9V battery

Coverage: Up to 527 sq. ft (7-meter radius)

- ✓ Green indicator light when active
- ✓ Emits 8Hz frequency to align with natural body rhythms
- ✓ Patent Pending

Stay Protected Anywhere

Merlin is designed for use in various environments
